-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 6) ☐ Other: ____.

DETAILED ACTION

Claim Objections

Claim 6 recites the limitation "the piston shoulder" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Bromell et al. (4,188,787).

In figure, Bromell et al. teach a device for a single-acting hydraulic cylinder 10 designed to lift or pull a load upon the existence of an oil pressure on the rod-side of a cylinder piston 14, characterized in that the cylinder bottom (not numbered) of the hydraulic cylinder 10 is provided with a drainage outlet 110 for leaking fluid, as well as an air inlet.

Allowable Subject Matter

Art Unit: 3745

Claims 3 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consist of three patents.

Hochsattel (4,646,518) is cited to show a device for a single-acting hydraulic cylinder designed to lift or pull a load upon the existence of an oil pressure on the rod-side of a cylinder piston, characterized in that the cylinder bottom of the hydraulic cylinder is provided with a drainage outlet for leaking fluid, as well as an air inlet.

Kime (4,707,993) is cited to show a device for a single-acting hydraulic cylinder designed to lift or pull a load, characterized in that the cylinder bottom of the hydraulic cylinder is provided with a drainage outlet for leaking fluid, as well as an air inlet but fails to teach an oil pressure on the rod-side of a cylinder piston.

Smith (5,743,716) is cited to show a device for a single-acting hydraulic cylinder designed to lift or pull a load upon the existence of an oil pressure on the rod-side of a cylinder piston, characterized in that the cylinder bottom of the hydraulic cylinder is provided with a drainage outlet for leaking fluid, as well as an air inlet.
